

VVE information

Extra support for your toddler

Nurseries do not just exist for children of working parents. All children stand to benefit from this type of childcare. Simply by playing, they develop language skills, and they learn how to share and work together with others. These skills leave them well prepared for primary school.

Various childcare organisations also offer early childhood education [**Voor- en Vroegschoolse Educatie**], or VVE. Children aged between 2 and 4 who are on this programme get extra support and attend nursery more often.

If your child needs extra support, the paediatrician at the child health clinic will check whether your child is eligible for VVE. This is referred to as a VVE assessment. Children with a VVE assessment are eligible for a VVE place.

How does VVE work?

A toddler with a VVE assessment will attend additional morning or afternoon playgroups.

You can sign your child up yourself at a nursery of your choice.

An overview of nurseries that offer VVE can be found on the website of the Municipality of Hardenberg: www.hardenberg.nl/vve.

How much does VVE cost?

When your child needs a nursery place with VVE, the municipality will give you a discount on your contribution as a parent. If your child is given a VVE place, you will need to pay around €15 per month yourself. The municipal authority will cover the rest of the cost.
